Lake Champlain 2010 Conference: Our Lake, Our Future

June 7-8, 2010

University of Vermont Davis Center

CALL FOR ABSTRACTS

CALL FOR PAPERS

Journal of Great Lakes Research — Special Issue for Lake Champlain

The Lake Champlain Research Consortium (LCRC) and the Lake Champlain Basin Program (LCBP) are pleased to announce the next Lake Champlain conference to be held at the Davis Center on the University of Vermont Campus on June 7 and 8, 2010. All individuals involved in research related to the Lake Champlain Basin are invited to submit abstracts for consideration as oral or poster presentations addressing, but not limited to, the following areas: physical limnology, fish communities, watershed processes, nutrient management, emerging contaminants and toxins of concern, climate change, habitat and wildlife, plankton, aquatic invasive species, and ecological economics. The goal of this conference is to bring the research community together to share knowledge, identify needs, and enhance communication and collaboration among disciplines. Keynote presentations will focus on the economic value of natural resources and the effects of climate change in the Lake Champlain Basin.

Submitting a Conference Abstract: Abstracts for oral and poster presentations may be submitted to the LCRC. Please use the abstract submission form available on the LCRC website (<http://academics.smcvt.edu/lcrc>), and submit the form electronically by Friday, January 15th, 2010.

Oral presentations will take place on Monday and Tuesday June 7 and 8, 2010 and will be organized into topical sessions. Each presentation will be limited to 15 minutes, with an additional 5 minutes for questions. Posters will be displayed throughout the conference, with designated poster sessions on both days of the conference.

Submitting a Paper Abstract: The conference abstract submission form can also be used to indicate your intention to submit a manuscript to be considered for publication in a special Lake Champlain edition of the *Journal of Great Lakes Research*. Authors do not have to present at the conference to be eligible to submit a paper. This form should also be submitted to the LCRC by January 15th, 2010; the deadline for manuscript submission will be August 13th, 2010.

Conference Registration:

Registration details will be posted on the LCRC website (<http://academics.smcvt.edu/lcrc>) in January 2010. The anticipated registration fee will be approximately \$50 per person, inclusive of meals.

For more information, please contact Doug Facey, LCRC at dfacey@smcvt.edu
or Eric Howe, LCBP at ehowe@lcbp.org.
