

# Film as **ART**

## Written Analysis and Critique Due Tuesday

Filmmaking is a media form that often involves creative acts of artistry. However, there are moments where the film form is elevated to become a truly innovative ART form in and of itself.

Watch the films posted on the course web page. For each one, describe and explain what has (or hasn't) **elevated** each film to the level of a **creative lasting ART FORM**. Be specific! You'll want to refer not only to content and the semiotics, but obviously to the range of creative techniques/tactics which likely went on behind the scenes in order to produce the films.
