Travelers

Exhibition Duration:

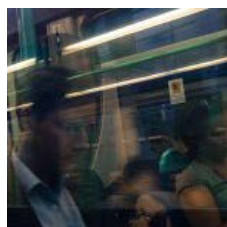

28 September – 10 October 2018

People traveling from one place to another always attract our attention. There is always something interesting about them. It could be their clothes, the luggage they carry, the language they speak or even the way they travel. A photographer could not ignore all these facts and just walk by. The whole idea of traveling, appealing as it is, becomes even more attractive when viewed through the lens of a camera. Different notions of traveling can be seen when looking at photos showing people traveling. There is the comfortable way, in a luxurious car, train wagon or plane and there is always the other aspect, being in the same means of transport with hundreds of people, going from one place to another being extremely crammed. Nevertheless the initial aim is achieved one way or another.
