Photography exhibition

Water Photography

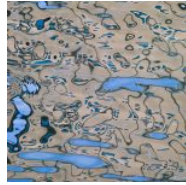

Exhibition Duration:

20 September – 2 October 2019 Water photography has many sub-categories. Some artists only shoot Waterscapes, while others are lovers of Underwater Photography. Any way, the water element gives a completely different atmosphere to the whole concept. It is not always easy to take such photographs, but the result is very rewarding most of the times. Regardless of whether the photograph is underwater or not, or if it has the human element, it is always fascinating. A completely new world is revealed in front of our eyes, unknown to the majority of the viewers. Water photography is a very demanding genre, as it has its own difficulties the solutions of which are not always an easy task to do. **Participating artists:**
